**CRITERION II - TEACHING-LEARNING AND
EVALUATION**

(2.7 - Student Satisfaction Survey)

A Report on Student Satisfaction Survey

A.Y. 2023-24

Introduction: In line with the 2nd criterion of NAAC (National Assessment and Accreditation Council), which emphasizes student satisfaction; our institution has conducted a comprehensive survey to gauge the sentiments and preferences of our student body. The survey aimed to identify areas where improvements can be made to enhance the overall learning experience. Among the key findings, the demand for ICT-enabled teaching methods and advanced infrastructure emerged as prominent themes.

Survey Analysis:

1. ICT-enabled Teaching:

- A significant portion of the student body expressed a strong preference for instructional methods leveraging Information and Communication Technology (ICT).
- Students highlighted the benefits of interactive digital learning platforms, virtual labs, multimedia resources, and online collaboration tools.

- There was a consensus that ICT integration enhances engagement, facilitates personalized learning, and fosters a deeper understanding of complex concepts.
2. Advanced Infrastructure:
- The survey revealed a widespread desire among students for advanced infrastructure facilities.
 - Improved access to high-speed internet, modernized classrooms equipped with smart boards, and well-equipped laboratories were identified as priority areas.
 - Students emphasized the importance of creating a conducive environment for both academic and extracurricular activities through upgraded facilities.

Implications and Recommendations:

1. ICT Integration:
- It is imperative to prioritize the integration of ICT tools and resources into the teaching-learning process.
 - Faculty members should be encouraged and provided with adequate training to effectively utilize digital platforms and tools to enhance instructional delivery.
 - Investing in robust Learning Management Systems (LMS) and virtual learning environments can facilitate seamless interaction between students and educators.
2. Infrastructure Enhancement:
- Allocating resources towards upgrading infrastructure is essential to meet the evolving needs of our student community.
 - Collaboration with industry partners and leveraging technology grants can help in acquiring state-of-the-art equipment and facilities.
 - Regular maintenance and upkeep of existing infrastructure should also be prioritized to ensure optimal functionality and usability.

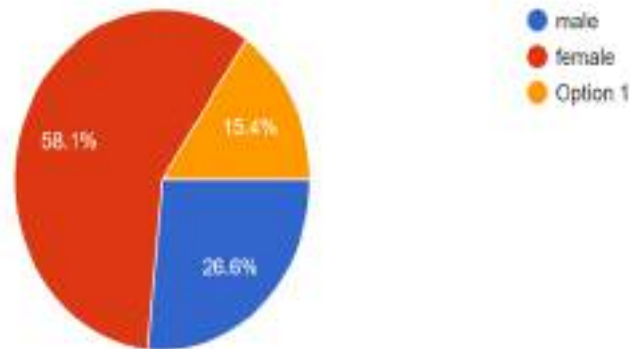

Conclusion: The findings of the student satisfaction survey underscore the critical role of ICT-enabled teaching and advanced infrastructure in enriching the learning experience. Addressing these demands will not only enhance student satisfaction but also contribute to the overall academic excellence and

competitiveness of our institution. By aligning our priorities with the expressed needs of our students, we can foster a dynamic learning environment that empowers students to thrive and succeed in their academic pursuits.
